

soulbrain MI, incorporated in the state of Michigan in 2010, is a research and development corporation producing the electrolyte portion of the lithium-ion battery market segment. We are the North American headquarters for lithium-ion R&D and production for *soulbrain*.

soulbrain, our parent company located in South Korea, has developed, manufactured and supplied core materials to the high technology industry for 30 years. *soulbrain* has been producing cutting edge electrolyte for the advanced lithium-ion battery industry for over 15 years. It is our purpose to help create a more sustainable and environmentally friendly future.

soulbrain has introduced their advanced electrolyte technology and the strong commitment to research and development to the United States through the subsidiary *soulbrain* MI. We at *soulbrain* MI work closely with the advanced lithium-ion battery producers that are a major part of the next generation of transportation and energy storage.

[Company] Soulbrain MI

[Location] Northville, Michigan

[Website] www.soulbrainmi.com / parent company : www.soulbrain.co.kr

[Main Product] Electrolyte for Lithium ion battery

[Job Title] Process Engineer

[Experience] 1-3 years experience in Laboratory or production line

[Education] College Degree at Chemical Engineering or Material Engineering or Chemistry etc.

Related to Science Majors

- [Job Description]
- Electrolyte Production
 - Inventory Management
 - Facility Sustain & Management
 - Coordinates with other departments
 - Interacts closely with R&D, Chemical analysis
- [Requirement]
- Knowledge of Microsoft Office Product
 - Excellent Communication skills (Korean and English)
